(Hungary) 1959, v. 13, no. 2, p. 88-90.

DESCRIPTORS: *Skin, *Diseases, *Drugs, Therapy,
Blood sugar, Ointments, Sulfonamides, *Amides

Only in a few cases did the authors observe any
symptomatic improvement in response to the treatment
of psoriasis with Bucarban. They examined the course
of the blood-sugar levels on a fasting stomach as well as
under glucose load. They attribute the results obtained
to the insulin-like effect of Bucarban, which improves
the general condition and increases appetite. (Author)
